HEK30D + WBOV

Innovative weatherproof housing for indoor/outdoor installations. Made of extruded aluminium and plastic material, it is provided with an innovative opening system which allows access to the housings's interior; the body and the sunshield slide forward and hang in place, while the unit remains fixed allowing access to the camera from all angles. Its dimensions make it suitable for CCD cameras equipped with fixed lenses. Sturdy construction at a light weight, HEK has two mounting options at the same time: regular (WBM) or feed-through (WBOV) bracket.

Its weatherproof features are ensured by EPDM-rubber gaskets and 2 PG9 + 1 PG11 cable glands with their specific gaskets. A wide range of accessories is available, including sunshield, heater and fan-assisted heater, blower kit and camera power supply. The accessories are supplied factory installed or as simple upgrade kit. The innovative concept allows the installation in different environments, either outdoor or indoor.
